Elvaco CMi-Box wMBus Gateway (Discontinued)

Part Code	Name	Details
EL233CM	Elvaco CMi Box External GPRS, wMBus	Reads up to 128 meters. Wireless MBus input.
EL240PS	CMi Box 240v Power Supply	240 V power supply for the CMi Box.

The CMi Box is a flexible solution for collecting meter values that can be customised to each customer's needs. It is easy to mount and install and is ready to use with any meter following the MBus standard protocol. The enclosure gives good protection and can be sealed for extra safety. Meter value reports can be delivered by FTP, HTTP and email, and the email report feature avoids firewall and IT structure problems.

Features:

- Wireless MBus receiver mounted inside the unit
- Option for external GSM and wMBus antenna, sold separately
- Supports individual meter encryption keys
- GSM output for remote connectivity
- 230 VAC power, option for 12 to 24 VDC
- Supplied with mounting bracket
- Optional integrated MBus master for up to 8 wired slaves
